

Print, without the counter.

KatterPrint kiosks let customers scan, upload from their phone, pay and print, with no one at a counter. You host the kiosk and set the rates; the vendor console does the rest.

PAGE

Get started

Four steps to your own kiosk

A print counter that runs itself.

The customer does every step on their own phone, and the phone drives the printer directly. You keep paper in the tray and watch everything from the vendor console.

01

Scan the kiosk

The customer scans the QR on the kiosk with the KatterPrint app.

02

Upload and pick pages

Pages, copies, colour and sides, with the price shown before paying.

03

Pay by UPI or wallet

In the app. No cash, no change, nobody at a counter.

04

Collect the print

The phone sends the job to the printer. Pages land in the tray.

Runs itself

Scan, upload, pay, collect. Nobody stands at a counter for every job.

Pricing you control

You set the per-page rates for your kiosks and change them from the console.

Live vendor console

Orders, toner, paper and payouts in one dashboard, on a phone or a laptop.

Private documents

You never open the customer's file. They delete it when they are done.

Pick by venue and footfall.

Mini

KP-Mini-250

Best for a shop corner, a library or a cafe.

Connectivity	Wi-Fi
Height	180 cm
W × D	75 × 85 cm
Paper	250 pages

[Full specification on page 05](#)

Classic

Install, sign in, upload.

- 🔒 No pen drive, no WhatsApp to the shop
- 🔒 No cash and no waiting for change
- 🔒 The shop never opens the file

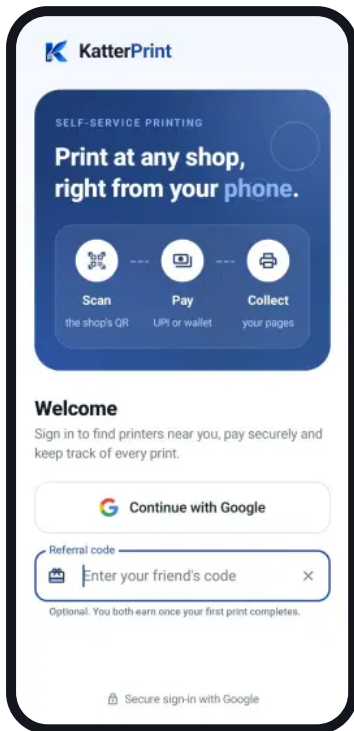

GET STARTED

Get the app and sign in

KatterPrint runs on Android. Install it once and you can print at any KatterPrint printer.

- ✓ Download the KatterPrint app from katterprint.com/download.
- ✓ Open it and tap Continue with Google to sign in.
- ✓ Have a referral code from a friend? Tap Have a referral code? before you continue.

🔑 One account works at every KatterPrint printer, and your wallet and orders follow you.

STEP 1

Upload your file

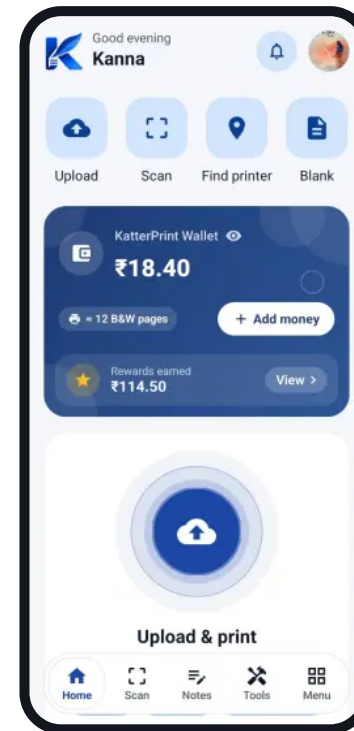

Start from the Home screen. Your file stays on your phone until you choose to print it.

WHAT YOU CAN PRINT

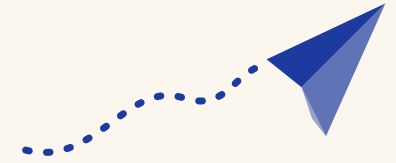

- ✓ PDF files
- ✓ Word documents
- ✓ Photos (JPG, PNG)

HOW TO UPLOAD

- ✓ Tap Upload on the Home screen and pick a file from your phone.
- ✓ Or tap Scan to photograph a page with the KP Scanner.
- ✓ Files you used before are in Menu → Saved Files.

Pick the pages, find the printer.

STEP 2

Choose pages and settings

On Print Configuration, set up the print exactly the way you want it. The price updates as you go.

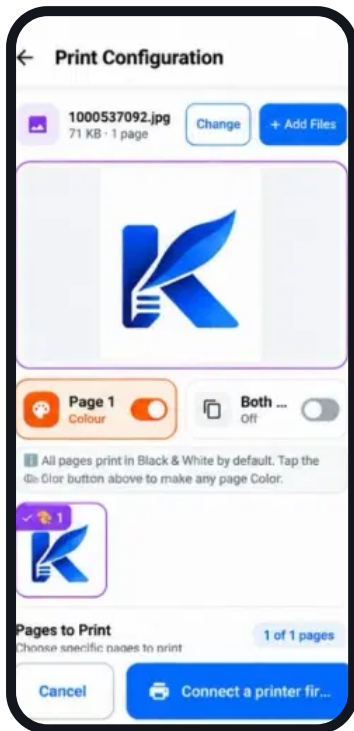

PAGES

- ✓ All pages, or Custom to type a range, for example 1, 3, 5-7, 10.
- ✓ Swipe through the preview to check every page.

SETTINGS

- ✓ Copies: how many of each page.
- ✓ Colour or Black & White, where the printer supports colour.
- ✓ Single-sided or Double-sided, where the printer supports it.

📄 Paper is A4. The estimated cost is shown before you pay.

STEP 3

Connect to the printer

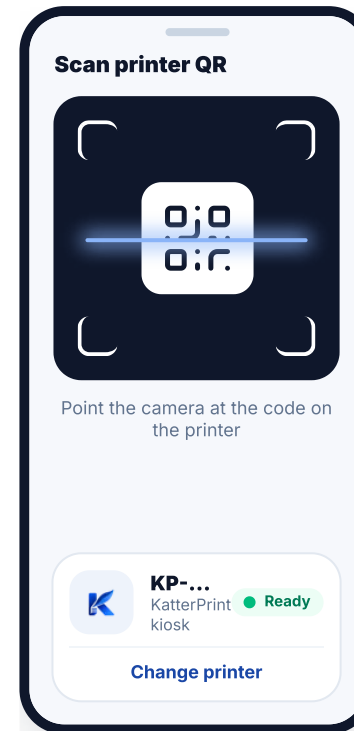

Every KatterPrint printer has a QR code on it. Scanning it tells the app which printer to use.

AT THE PRINTER

- ✓ Tap Scan printer QR and point the camera at the code on the printer.
- ✓ The printer's name appears in your print summary. Tap Change printer to pick a different one.

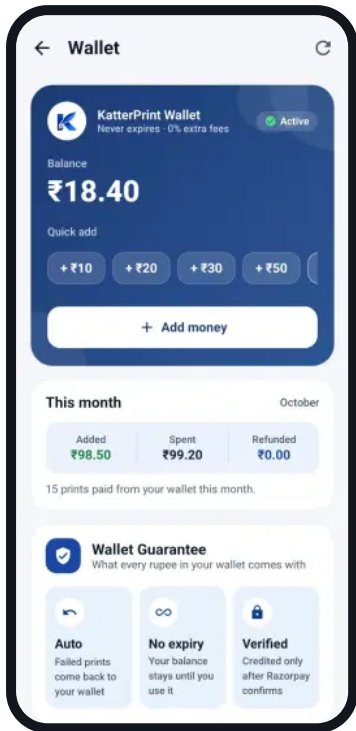

LOOKING FOR A PRINTER?

- ✓ Tap Find printer on the Home screen to see KatterPrint printers near you.

Pay, then collect the paper.

STEP 4

Pay for the print

Pay from your KatterPrint Wallet or by UPI. No cash and no waiting for change.

WAYS TO PAY

- ✓ KatterPrint Wallet: the print is paid from your balance in one tap.
- ✓ UPI: pay with any UPI app.
- ✓ Wallet short? Tap Top up to add money, or pay the print by UPI.

COUPONS

- ✓ Have a coupon? Enter the code before you pay.

🔔 Wallet money never expires, and you can see every top-up and print in the Wallet screen.

STEP 5

Print and collect

Once you have paid, your phone sends the job straight to the printer.

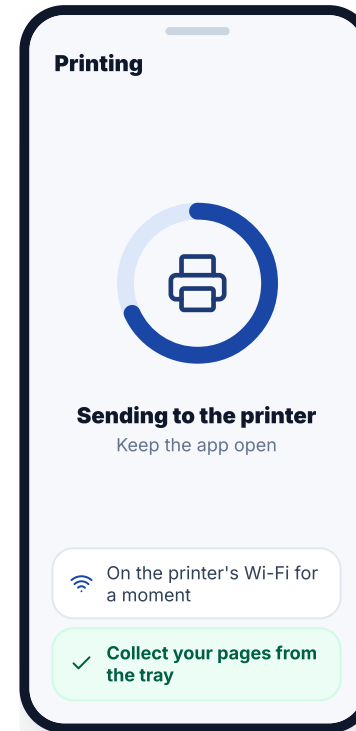

WHILE IT PRINTS

- ✓ Keep Wi-Fi turned on. The app joins the printer's Wi-Fi for a moment, so your mobile internet may pause and then come back on its own.
- ✓ Watch the progress on screen and collect your pages from the tray.

IF SOMETHING GOES WRONG

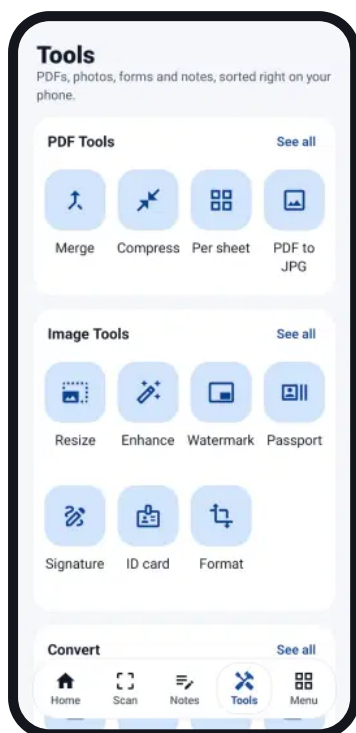

- ✓ If a print fails, the money comes back to your wallet.
- ✓ Tap Report issue on the print screen to tell us what happened.

🔔 When it is done, rate your print. It helps the shop and other customers.

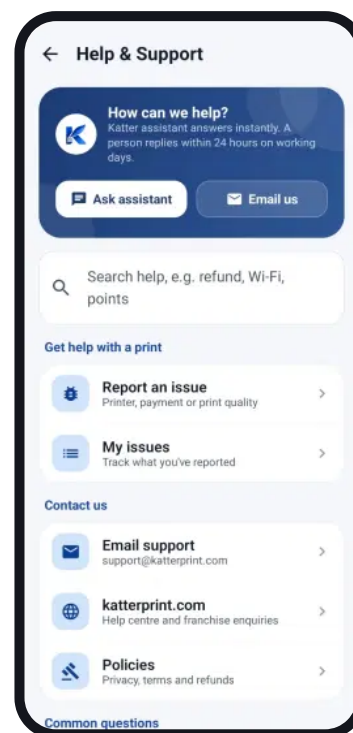

Tools, and help when stuck.

More you can do

KatterPrint does more than print a file you already have.

- ✓ Blank Pages: print plain A4 sheets for exams, notes or rough work. No file needed.
- ✓ Tools: merge, compress and convert PDFs, and resize or enhance photos, right on your phone.
- ✓ ID card copy: front and back of a card on one page, at real size.
- ✓ Saved Files: your uploads and scans, ready to print again.
- ✓ Orders: every print and its receipt, in Menu → My Orders.

Help and support

Stuck at any step? Help is in the app, any time.

IN THE APP

- ✓ Open Menu → Help & Support.
- ✓ Ask assistant answers right away.
- ✓ Report an issue for a printer, payment or print-quality problem, and follow it in My issues.

EMAIL

- ✓ Write to support@katterprint.com. A person replies within 24 hours on working days.

The full guide, page by page, is at katterprint.com/user-guide. Help Center: katterprint.com/help.

Every kiosk, **one console.**

The KatterPrint vendor console runs in the browser on a phone or a laptop. One login covers one kiosk or fifty: pricing, revenue and status in the same place.

Phone or laptop

In the browser, nothing to install

1 to 50+ kiosks

One login for all of them

If a job jams or fails

The customer is refunded to Points or gets a reprint token, and you get a notification. Nobody is left waiting at a counter.

Live dashboard

Today's prints, revenue and kiosk status at a glance.

Orders and print queue

Every job, its pages and where it is right now.

Printers

Each kiosk's status, toner and paper.

Revenue and finance

Earnings by day, week and month.

Payouts

UPI and Points payments settle to your linked bank account through Razorpay Route.

Shop settings and pricing

Your rates, your hours, your shop details.

Customers and ratings

Who prints with you and what they think.

Issues and support

Customer issues and a line to our team.

Built for places people already print.

Shop owners

Stationery, xerox and bookstores adding a self-serve lane.

Space owners

A spare corner in a tech park, library, transit hub or co-working floor.

Coaching centres

Test papers and notes printed without a staff queue.

Campus partners

Canteens, hostels and student spots with daily assignment traffic.

First-time operators

A small, semi-passive unit with platform support.

Hostel and PG operators

A print point residents can use at 2am.

In the box

Pre-configured, branded kiosk

Wi-Fi print stack and IoT controller

Install support and training

One year on-site warranty, with remote diagnostics

Vendor console for the life of the unit

Account manager and a launch kit

The daily work: keep paper in the tray and swap toner when the console says it is low.

What partners ask before they sign.

The operational bits, answered. Anything else, write to support@katterprint.com and a person replies.

01

How does the kiosk work for a customer?

They scan the QR on the unit, upload from the phone, pick pages, pay with UPI or Points, and collect the prints. You do not handle the file.

02

Do I need staff at the printer?

No. Keep paper in the tray and swap toner when the dashboard says it is low. That is the daily work.

03

How do payments reach me?

UPI and Points payments settle to your linked account through Razorpay Route. The vendor console shows each job and payout.

04

What hardware and warranty come with it?

Industrial laser kiosk, IoT controller, Wi-Fi print stack, signage, and one year on-site warranty with remote diagnostics.

05

What if a job jams or fails?

Failed jobs refund to Points or a reprint token. You get a notification. The customer is not left waiting at a counter.

06

Can I run more than one campus?

Yes. One vendor console covers 1 to 50+ kiosks — pricing, revenue, and status in the same place.

Four steps to your own kiosk.

Apply online

City, proposed site and a short profile. The form takes a few minutes.

01

Site check

We review footprint, power and footfall with you before any hardware ships.

02

Agreement and dispatch

Sign digitally. The kiosk leaves branded, configured and ready to plug in.

03

Go live

Power, network, vendor console. First prints typically the same week.

04

Ready to host a kiosk?

Apply on our website and we will get back to you about your site, the right model and pricing.
